Education

Princeton University Princeton, NJ

Bachelor of Arts (A.B.) in Economics *Aug. 2021 – May 2026*

- Societies: James Madison Forum, Julis-Rabinowitz Center for Public Policy & Finance, Princeton Tower Club.
- Ad Rem: Machine Learning, Data Science, Machine Translation (NLP), Statistics, Calculus II, Multivariate Calculus, Linear Algebra, Microeconomics, Macroeconomics, Econometrics, Econometric Applications, Organization of Markets (Game Theory & Auctions), Market Failures.

Experience

SciTec | *Operations & Accounts Intern* May 2021 – Aug. 2021

- Independently led a term-length project to centralize IT asset inventory across 3 branches (100–200 persons): harmonized incomplete siloed datasets, and coordinated cross-office data collection & reconciliation.
- Wrote Python scripts to automate scraping, harmonization, synthesis, and upload of data into central database.
- Physically audited entire-firm IT inventory to capture inventory known to be unaccounted from existing datasets.
- Documented a repeatable audit methodology in Jira and Confluence that cut future lead times by 50%.
- Supported accounting operations through preparation and distribution of biweekly contract expenditure reports.
- Evaluated enterprise software vendors and contributed to procurement recommendations.

PricewaterhouseCoopers | *Non-Profit Consulting Extern* June 2022 – Aug. 2022

- Served as a strategy consultant & learned how to create value for clients based on vision & mission.
- Built and delivered client-facing presentation synthesizing data-driven insights and recommendations.
- Leveraged deep research to analyze complex problems ranging from fundraising and development, stakeholder management, to impact measurement, utilizing consulting frameworks to solve problem areas in client's operations
- Gathered, analyzed, and visualized data to inform operating problem areas and synthesize possible solutions.
- Chaired weekly extern focus groups, improving team coordination and cohort efficiency.

MyMentor | *College Application Advisor & Tutor* Aug. 2021 – Jan. 2024

- Advised domestic and international students through the U.S. college admissions process.
- Led individualized coaching covering strategy, extracurricular planning, standardized testing, & essay development
- Brainstormed college application essay topics and critiqued essays according to content, structure, and language.
- Mentored students on application timelines, LORs & procurement, school decisions, research, major choice, etc.

Leadership & Service

Princeton University Sailing Team | *Member* Sep. 2022 – May 2026

- Practiced 2–3x weekly on the Delaware River, competing in intercollegiate regattas across the Northeast.
- Spring 2024: Crewed at Admiral's Cup Regional Championship.

Princeton University Chapel | *Chorister & Undergraduate Deacon* Sep. 2021 – May 2026

- Participated in weekly liturgical services, choral performances, and performed in ticketed concerts as a chorister.
- Served as undergraduate deacon, supporting service operations and fostering congregational engagement.
- Selected as a student speaker for Princeton University's Opening Exercises for the Class of 2026.

Research & Projects

Princeton University | *Department of Economics Senior Thesis* Sep. 2025 – Apr. 2026

- Operationalized Gyourko et al.'s WRLURI & sub-indices in R & Stata to estimate effects of local policy on CBSA-level housing affordability metrics via cross-sectional OLS with state Fixed Effects on 15M+ ACS microdata records.
- Validated findings across dual affordability outcomes, progressive unit quality and hedonic control specifications, independent vs. simultaneous sub-index inclusion, and nonlinearity checks with CBSA-clustered robust SEs; probed reverse causality via lagged-regulation predictive tests and 2006–2018 WRLURI-delta Difference-in-Difference analysis.

Princeton University | *Department of Economics Junior Paper* Jan. 2025 – Apr. 2025

- Estimated the effect of metro-level college-graduate saturation on graduate homeownership via DiD (post-bubble) on ∼5M IPUMS CPS ASEC records in Stata; -1.9pp effect ($p < 0.001$), robust to HDFE, Metro- vs. state-level SE clustering, & with/without covariate specifications.

Princeton University | *A Semantic Analysis of Politically Charged Words in News Corpora* May 2026

- Implemented NLP methods in Python to parse and vectorize scraped news corpora, obtaining embeddings, operationalizing k-means clustering, cosine & Jacard similarity to analyze latent semantic shifts in politically charged terms over time.

Independent Project | *NYC Congestion Pricing Analysis* Sep. 2026 – Oct. 2026

- Estimated causal effects of NYC congestion pricing on tolled traffic through 2026 using augmented synthetic control in R on MTA & PANYNJ open crossing data pulled via Socrata API; constructed a contamination-free donor pool, ran placebo inference and lambda & estimator sensitivity variants as robustness checks.

Skills

Programming: Python, R, SQL | **Libraries**: Keras, Pandas, Pytorch, Numpy, Sci-kit Learn, Pynini, spaCy, NLTK, Tidyverse, Tidymodels, Shiny, glmnet, torch, caret | **Software & Systems**: Stata, Berkeley SDA, SPSS, QGIS, Office365, Git, Linux, LaTex | **Languages**: German (B2 CEFR)

Interests: Econometrics, Data, Sailing, Jazz, Fitness, Prediction Markets, Puzzles
